marketing software:
The takeover of personalization**

COMCAP
Where commerce meets capital

An introduction to ComCap

- ComCap is a premier boutique investment bank focused on the intersection of commerce and capital, with key focus on B2B SaaS, B2C ecommerce, payments, mobile commerce, marketplaces and B2B services for retail technologies (IT and marketing services, in-store, fulfillment, logistics, call center, analytics, personalization, location intelligence)
- Headquartered in San Francisco with European coverage from London & Moscow, and LATAM coverage from Sao Paulo. Our firm works with mid-cap public companies on buy-side initiatives and public and private growth companies on financing and strategic M&A
- In addition to being the only boutique focused on disruptive commerce models, we differentiate by:
 - Bringing bulge bracket techniques to emerging models;
 - A strong and uncommon buy-side/strategy practice;
 - Deep understanding of industry drivers and synergy analyses;
 - Deep relationships across the sector; and
 - Worldwide coverage with closed transactions in the United States, Japan, China, the ASEAN region, Western and Eastern Europe and Latin America
- Your global ComCap team:

ComCap's current thematic focus areas

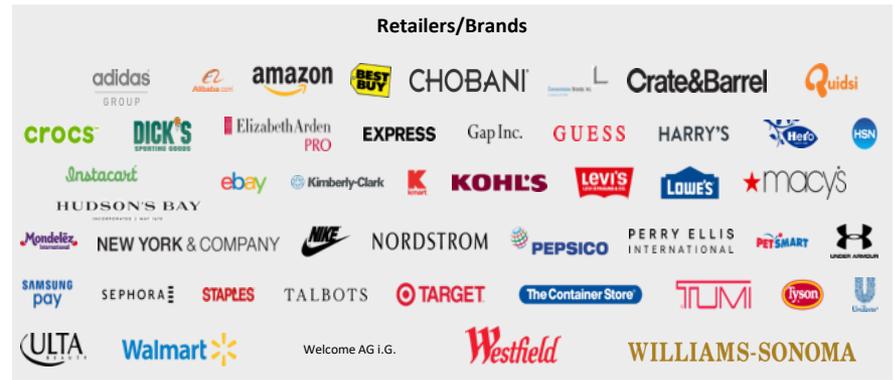

Theme	Description	Select companies
Artificial Intelligence / Analytics	Focus on disruptors in the artificial intelligence space focused on ecommerce, logistics, retail, predictive, payment, risk and marketing	     
B2C and Vertical Brands (DNVBs)	Digitally native D2C brands harnessing modern technology and business models to reach the end consumer, covering clothing, accessories, personal care, home and kitchen, furniture, and other consumer-focused products	   
Ecommerce SaaS	Emerging and disruptive SaaS businesses in the ecommerce sector	   
Fintech	Retail and commerce-related disruptors in the fintech universe. Current focus areas include payments, risk analytics, false declines and retail point-of-sale, especially mobile (mPOS)	    
Logistics	Emerging platforms and providers innovating and optimizing the many facets of the supply chain ecosystem	   
Marketing Suites	Emerging platforms in digital marketing, who focus on optimization in digital marketing and content delivery	  
Mobile	Focused on mobile solution providers optimizing the mobile experience from desktop-to-mobile website conversions, targeted mobile marketing, to simplifying the mobile checkout experience	   
Personalization	Emerging players in the ecommerce personalization space	    
Retail In-store technology	Platforms and solutions that enable retailers improve customer experience, productivity, and operational inefficiencies	    
Agencies and System Integrators	Agencies and systems Integrators implementing retail focused technology spanning the above sectors, including large SIs covering multiple platforms, as well as smaller SIs covering just one or a handful of platforms	   

ComCap – Active in 14 countries, including 9 of the top 10 global ecommerce markets

Marketing funding landscape

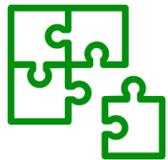

High demands for personalized content is driving superior customer engagement

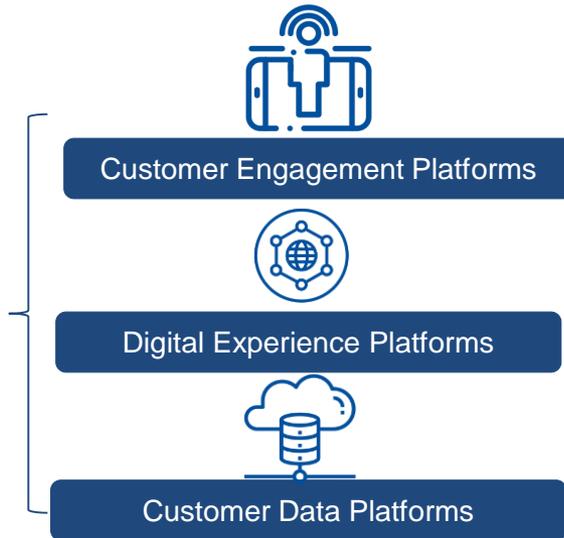

Challenge

Companies keen on data-powered customer engagement, scaled with automation, and personalized through AI that legacy engagement / marketing platforms are not able to provide

Solutions

- Solutions that allow businesses to execute marketing campaigns with customers through:
 - Personalized recommendations for products and services
 - Integration with CRM, mail, social media, chat, etc.
- Improving customer satisfaction and creating loyal customers

- Platforms that enable companies to design and deliver personalized user experience across multiple channels and devices throughout the customer engagement process

- Software that aggregates and organizes customer data across a variety of touchpoints and structures real-time data into individual, centralized customer profiles

Results

- Customer engagement increases the probability of selling to an existing customer
- Advances in marketing automation and AI are enabling enterprises to respond to more complex requests

Case Studies

“Live in Levi’s” campaign

A social engagement website with photos and videos is now integrated into Levi’s ecommerce site to offer greater customization and personalization of Levi’s clothing

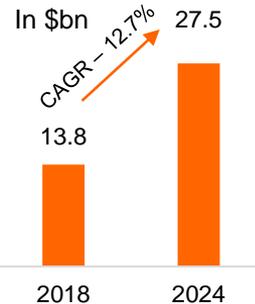

ING Group

Accelerated its marketing communication processes, cut its time-to-market for personalized campaigns in half, increased cross-sell rates in its call centers, and boosted incremental sales conversions by up to 120%

Digital marketing software market trends and outlooks: hypergrowth across all subsegments

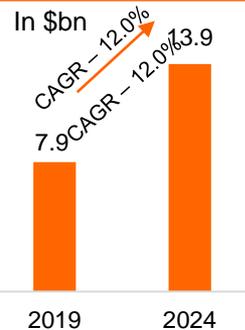

Customer Engagement Platforms (CEPs)

- North America is the largest CEP market driven by IBM, Microsoft, Nuance Communications, Oracle, and Salesforce
- Integration with AI is another trend that is becoming a standard offering by vendors

Digital Experience Platform (DXP)

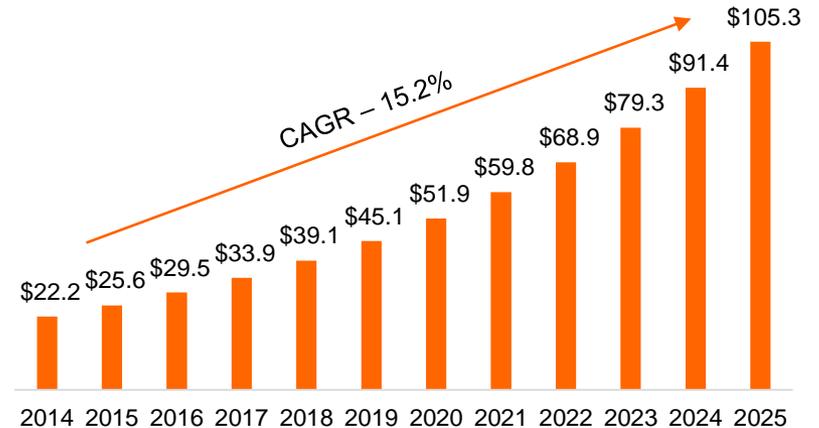

- Increasing efforts by companies to deliver **personalized, integrated, and optimized user engagement & experience** across multiple marketing channels are expected to drive growth
- Due to the growing demand, the solution providers are focusing on **acquisitions and new product development**

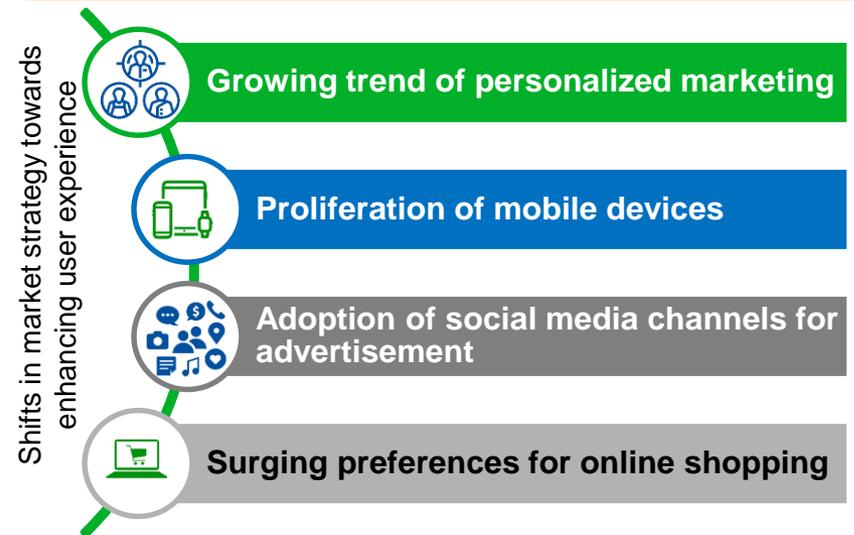

Customer Data Platform (CDP)

- The CDP market valued at \$730.1m in 2018 is expected to grow at a CAGR of 27.5% from 2019 to 2025
- The growing **adoption of account-based marketing** among organizations to manage data pertaining to their online and offline customers determines apt marketing strategies to drive growth
- In 2018, CDP vendors raised funds over \$1.5bn and were deployed by over ~4,000 enterprises

Digital marketing software market size 14' – 25'

Recent trends in user experience (UX)

The modern marketing stack offers targeted omnichannel campaigns powered by analytics, with the CDP as the hub

CRM / Messaging platform / analytics platforms

4 Analytics Platform

- Powers marketers across the stack by leveraging machine learning to create campaign-ready audiences
- Deliver targeted messaging and measure their ROI
- Predictive analytics forecast consumer behavior before it takes place
- AI and ML tools to are leveraged in analytics process to:
 - Control data quality
 - Build more robust marketing analytics models faster
 - Automate reporting and insight generation using Natural Language Processing (NLP) and Natural Language Generation (NLG)

1 Customer Data Platform

- Customer Journey
- Analytics and Reporting
- Segmentation and Personalization

2 Customer Engagement Platform

Social, SMS, Chat, Video and email

3 Digital Experience Platform

- Content Management System
- Commerce
- Portal

1

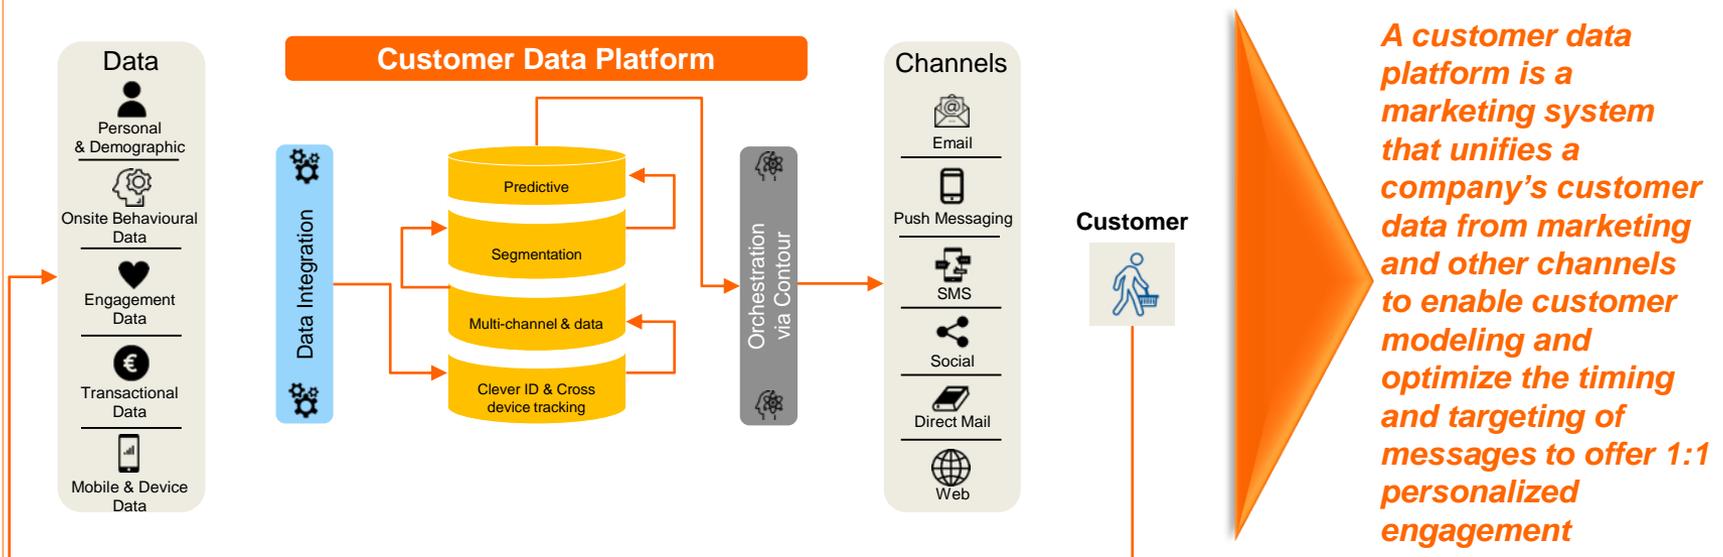

Customer data platforms orchestrate data ready for marketing campaign execution

What makes a platform “Consumer Data” Centric?

How CDPs work and what they do

“Must haves” for a platform to qualify as a CDP

- A central feature of CDPs is the ability to ingest first-party, individual-level customer data from multiple sources in real time, without storage limitations
- Data is stored as long as it is needed for processing. CDP data collection must include first-party identifiers such as emails or device IDs and attributes such as demographic information
- Offerings have evolved from a variety of mature markets, including multichannel campaign management, tag management, and data integration
- CDPs need the ability to send segments to specific tools for execution of email campaigns, mobile messaging, advertising, and other campaign or channel activity. CDPs may include activation features such as next-best recommendations, dynamic creative optimization, and testing and self-optimization capabilities
- Within the last four years, companies selling CDP technology have received nearly \$615.6 million in venture capital investments while the revenues of many of these CDP companies have yet to exceed the \$10 to \$15 million mark.

Source: Gartner, The Marketer's Guide to Customer Data Platforms; Email Vendor Selection, Why a Customer Data Platform Will Be the Next Evolution of Marketing Automation

CDPs combine the best features of other platform types

	1 Data Warehouse	2 Custom Integration	3 DMP	4 CRM	CDP
Housing all consumer data in one location	👍	👎	👎	👎	👍
Persistent platforms take new data about a consumer and add it to their profile over time	👍	👍	👎	👍	👍
A "packaged UX" making the platform easy to use	👎	👎	👍	👍	👍
The ability to collect consumer data in real time	👎	👎	👍	👎	👍
The ability to interact with legacy or new systems	👍	👎	👍	👎	👍

- 1 Traditional data warehouses** are unable to be easily used by marketing staff, as they traditionally are easier understood by those working in IT. Warehouses also exclude real-time data accessibility.
- 2 Custom data platform integration** requires time and resources from the company, and excludes packaged tools that enable non-technical employees to use the platform
- 3 Data management platforms (DMP)** target users anonymously instead of having a unified profile of specific customers
- 4 Customer relationship management (CRM)** systems are built to engage with customers, not built to ingest huge volumes of data from other sources

Customer data platforms are the only systems that unify customer data across sources in real-time and segment them for personalized marketing

CDP Vendor Comparison

Standard and differentiated features

Standard features include the following:

- Retaining the original detail of the customer when loaded into the system
- The ability to retain the input **persistent data** throughout the duration of customer discretion
- The ability for the system to recognize **individual detail** of each customer, unlike tradition tag location
- Vendor-neutral access** to data, allowing for easy data transfer from the CDP to other platforms
- Managed PII**, allowing each account to be associated with personal identifiable information such as name, phone number, and email address

Differentiated Features include:

- Data management** features such as platform and host data center compatibility
- Analytics** features such as customer segmentation and predictive marketing
- Engagement features** such as multi-step campaign management and real-time customer interactions

In order to stay relevant in what is quickly becoming a crowded field – many of these players are attempting to add more functionality to address deficiencies in their respective platforms

2

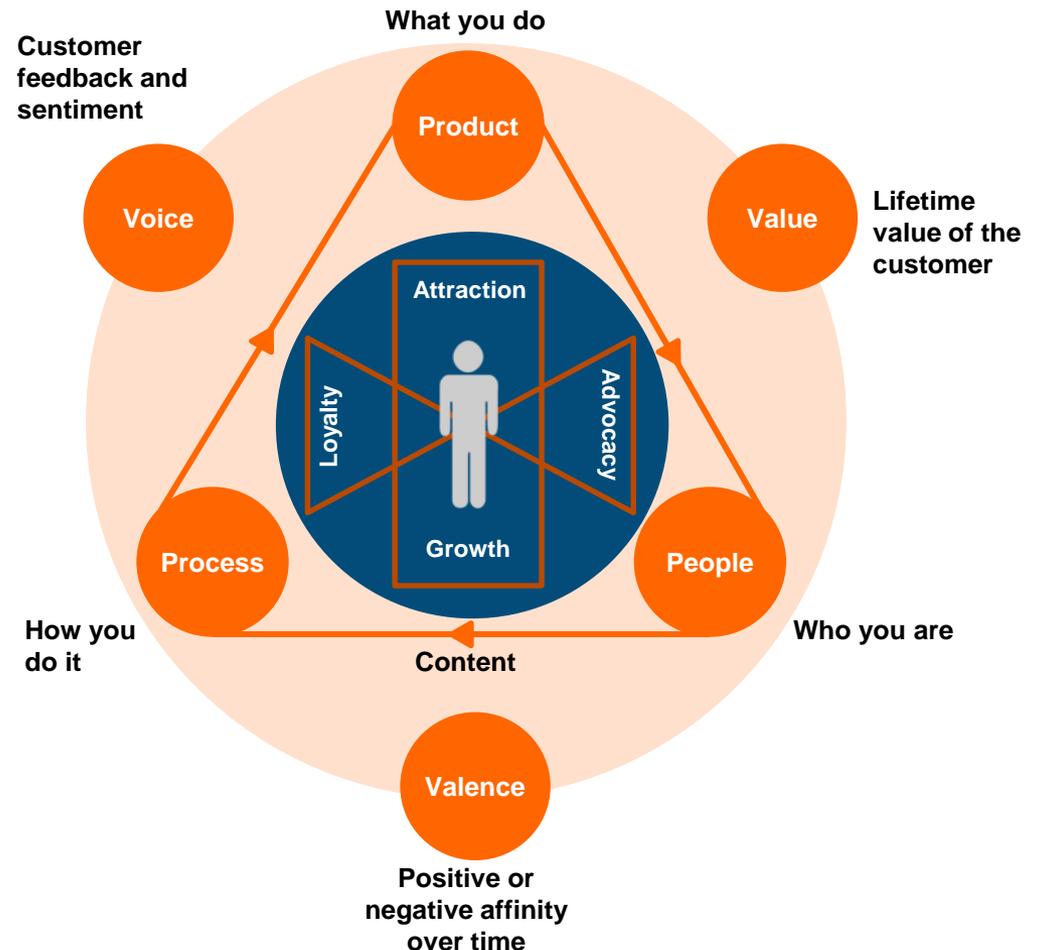

Customer engagement platforms turn to personalization in order to drive greater ROI

Personalization technology drives omnichannel consistency and establishes loyalty

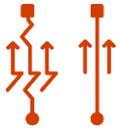

Retailers can combine online buying behavior with in-store shopping behavior data to serve customers with relevant information or offers right at the point of sale. Personalization helps cross-sell, up-sell and enhance customer experiences

Personalization in retail

- Direct input from the customer is key to create compelling and relevant personalized retail experiences.
- Retailers can use information from online buying behavior to serve customers at the point of sale based on the relevant input they require.
- This closes the gap between online and offline shopping experiences that previously created headaches for retail brands.
- Retailers are also increasingly delivering customized hyper-relevant online experiences through email and website personalization.
- Quality customer experience is manifested by the three following key pillars:
 - Who you are - your people
 - What you do - your products and services
 - How you do it - your business processes, methodologies and service levels
- The goal of marketing leaders is to attract customers, build relationships and establish a greater sense of loyalty.

Customer Engagement Platforms (CEPs) play the role of a highly automated wingman for sales teams

Simplified CRM

- Helps personalize communication with different customer segments across brands, products, and channels
- Enables customer interactions for closing new business, retaining existing customers, and expanding business with existing customers
- Allows pre-emptive customer communication based on predictive demand using customer data analytics

Accelerates Revenue Growth

- Multi-variate customer data analytics enables sales executives identify high value customers to leverage for new cross selling opportunities
- Enables targeted sales pitches using data from churn, renewal, upsell and other metrics
- Optimize sales rep mapping to clients based on performance and client effectiveness data

Automation

- Allows sales reps to streamline workflow and collaborate with and information sharing across teams
- Plan out in advance and automate client communications across channels like email, calling, social, notes, and in-person meetings.
- Personalized client communication based on A/B testing and conversation analysis

Superior Data Management

- CEPs are cloud-based data platforms, which allow for superior data storage with easy and cost-effective scaling
- Cloud-based data management also allows for better data security, governance measures and business tools necessary to protect sensitive customer data.
- Data is available in real-time across multiple channels

CEPs offer end-to-end client engagement services that cover the entire range of functions, spanning from generating leads to closing deals as well as after sales client communication

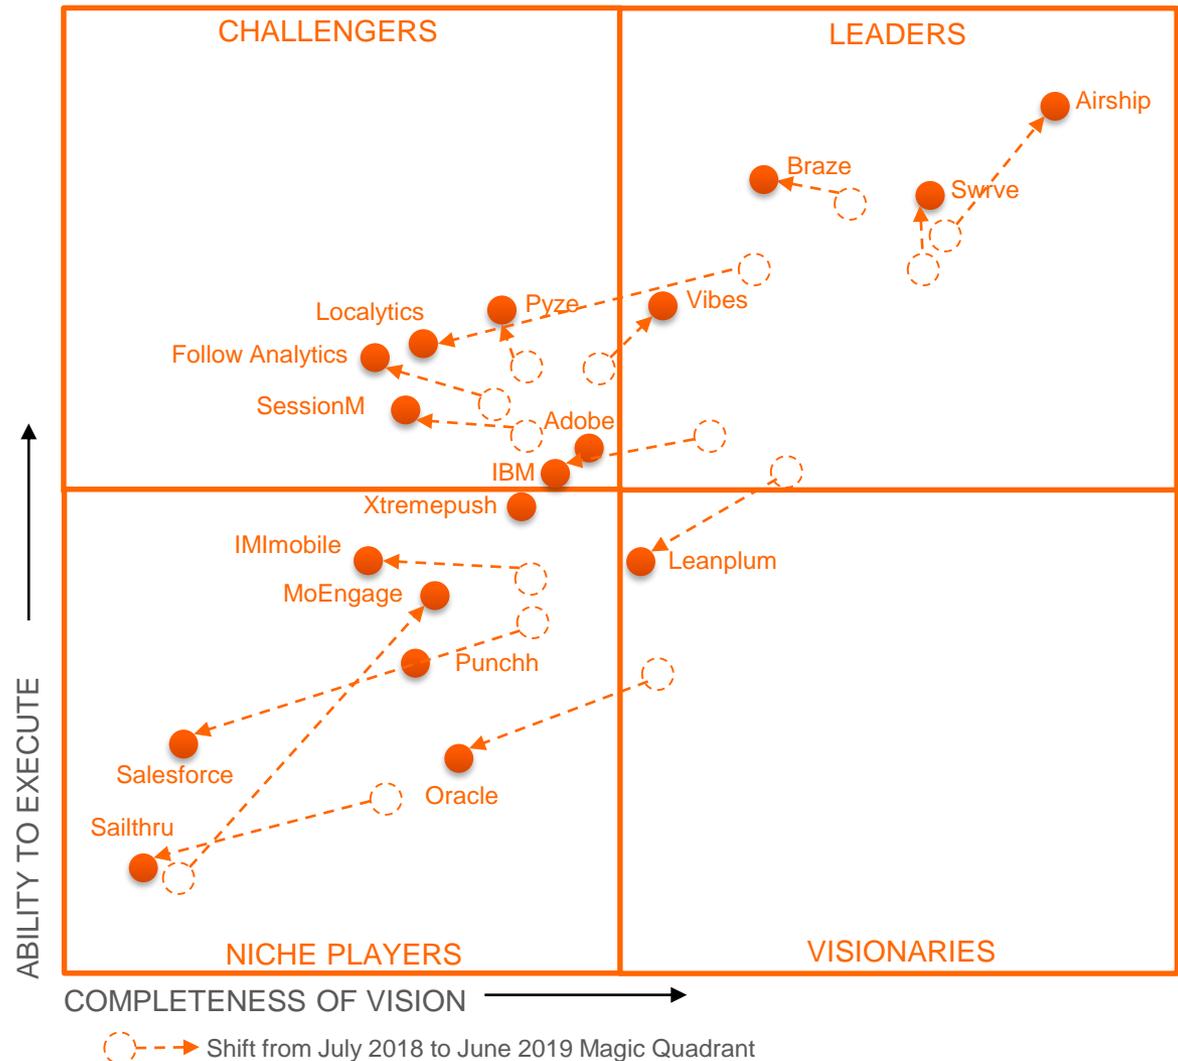

Magic quadrant for mobile marketing platforms

Mobile marketing platforms are rapidly evolving into the default channel for digital marketing campaigns

Key takeaways

- Mobile is a main driver for customer engagement, with good mobile marketing strategy now becoming a critical component of any marketing strategy
- CMOs surveyed in Gartner's 2018-2019 CMO Spend Survey allocate, on average, 6.4% of total marketing budgets to mobile marketing, with 68% of CMOs expecting to increase this investment in 2019 over 2018
- Mobile marketing strategies fall into two basic types:
 - Mobile centric – Utilizes the distinct capabilities of mobile devices and networks, such as cameras, GPS and microphones, to engage customers
 - Mobile extender – Adapt existing prospect and customer connections from the desktop to a mobile device. For e.g. a mobile-friendly version of the desktop website.
- Mobile Marketing Platform vendors are making 'data' their core value proposition

Case study: Airship has evolved from a traditional mobile marketing to a premier customer engagement platform

A combination of orchestration and engagement

- Airship's solution has evolved over time from a push-notification specialization tool to a purpose-built mobile marketing platform, powered by advanced artificial intelligence methodologies
- Since the 2018 Magic Quadrant, Airship has added AI and machine learning capabilities to augment its built-in analytics for audience targeting and campaign orchestration.
- Airship expanded its geographic reach and customer base with the acquisition of Paris-based mobile marketing platform, Accengage, and Apptimize, the leading mobile user experience solutions company.
- Airship is currently focusing on three growth areas:
 - Mobile channel proliferation, increasing TAM
 - Personalization and enhancing their intelligent orchestration offerings
 - Digital transformation through providing a best-in-class mobile customer experience
- Since inception, Airship has sent 3 trillion messages to over 1.8 billion contacts across leading B2C brands across the retail, media, travel, entertainment, telecommunications, and IoT verticals
- In the 2019 Gartner study, it received the highest product scores across all three use cases – acquisition, engagement and retention, among 18 mobile marketing platform vendors

What is User Generated Content (UGC) in marketing and advertising?

Content created by consumers with the potential to spark conversation around a product or service

- User Generated Content (UGC) refers to **any content created and put together by unpaid contributors / fans** in the form of pictures, videos, testimonials, tweets, blog posts, reviews, and live streaming.
- Content marketers are increasingly incorporating UGC campaigns as part of their content marketing strategy due to several benefits such as **highly trusted online content, strong brand affinity and engagement, and cost efficiency**
- This unique channel for marketing and advertising has three key components: **Brands, UGC Platforms** and **End-Users** (content)
- UGC Platforms **collect, curate and publish** user generated content by actively sharing content to engage customers, **enabling brands to build data-driven content strategies** that measure the impact and ROI of their influencer marketing program and content

UGC offers true engagement

UGC is **35%** more memorable than other media*

UGC is **50%** more trusted than other media*

What is driving growth of UGC in marketing and advertising?

Platforms

Emergence of social media and other UGC platforms such as YouTube, Instagram, Snapchat etc, with new platforms being introduced every year

Mobile Devices

Proliferation of smartphones with advanced camera and video capabilities has made it easier for consumers to share photos/videos and live stream

Influencers

Influencers have capitalized on the rise of social media and importance of brand equity & engagement to become one of the fastest growing forms of marketing

Unique Customer Engagement

Consumer frustration with intrusive advertising has led brands to explore alternative ways to engage customers

3

Digital experience platforms provide personalized customer experiences and inspire loyalty

Experience age: good customer preference data drives better personalization CX to improve engagement

CX a key driver of sustained loyalty

- CX is the new marketing in an Experience Age
- CX is the sum-totality of how customers engage with your company and brand
- Good CX drives positive brand emotion
- Customer loyalty is tied to CX quality – Forrester CX INDEX

Forrester's CX Index score measures how successfully a company delivers customer experiences that create and sustain loyalty.

Millennial opportunity

- Drive revenue for decades to come
- Value non-monetary benefits more than boomers
 - Free products
 - Higher priority service
 - Recognition as a valued customer
 - Personalized products or service
 - Charitable donation
- **Good personalized CX** that recognizes customers as valued individuals **requires better preference data**

Infographic Sources:

CX INDEX: The US Customer Experience Index, 2019, Forrester Research, Inc.
 Millennials: Get With The Program, Global Retail Loyalty Sentiment Report, Nielsen

Digital Experience Platform (DXP)

DXPs are enterprise software that provide an architecture for companies to digitize business operations, deliver connected customer experiences, and gather actionable customer insight

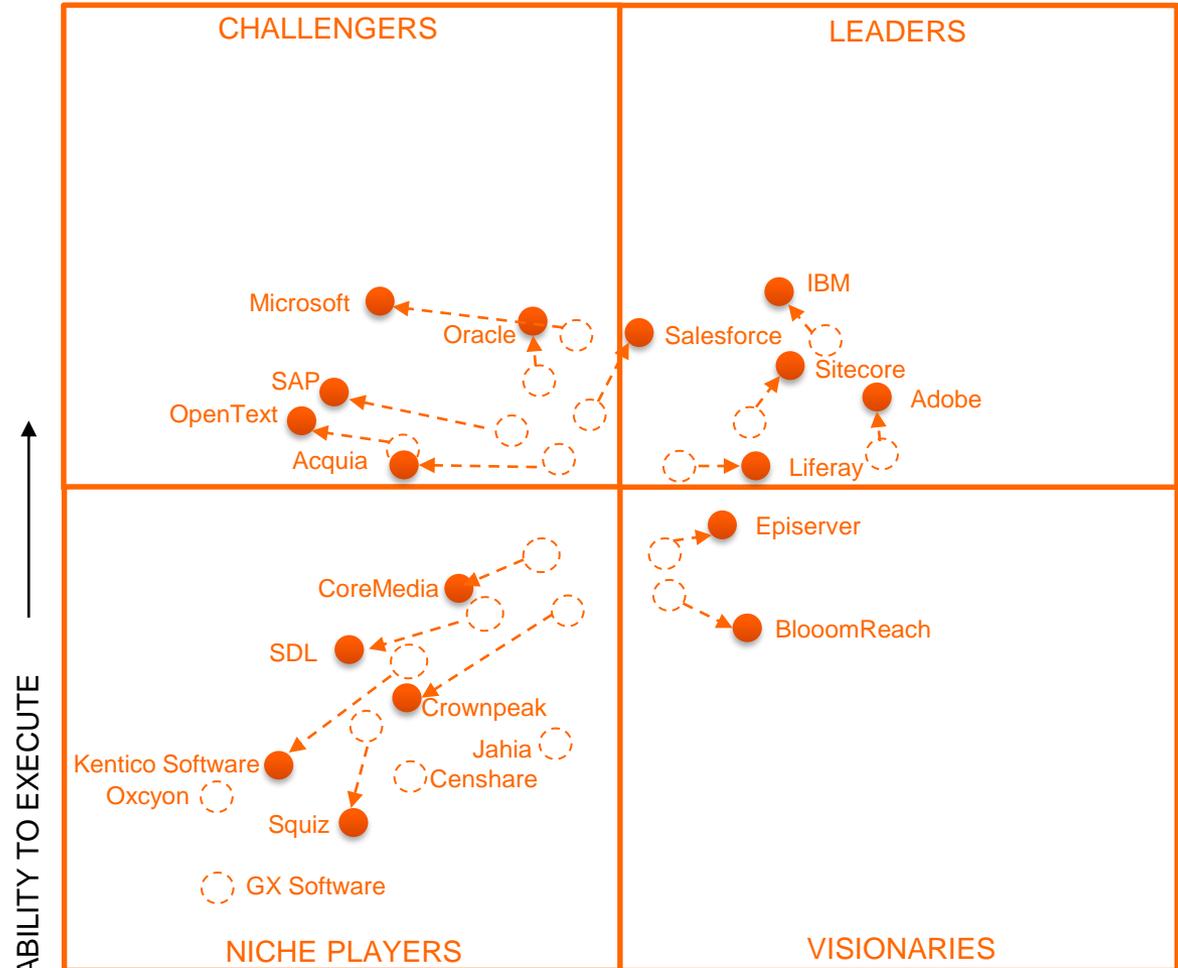

Magic quadrant for digital experience platforms

The DXP market is still evolving, growing rapidly but is relatively immature and far from maturity

Key takeaways

- DXPs are the key technological driver behind CX initiatives
- Through 2021, 85% of effort and cost in a DXP program will be spent on integrations with internal and external systems, including the DXP's own, built-in capabilities
- By 2021, 90% of global organizations would rely on system integrators, agencies and channel partners to design, build and implement their digital experience strategies
- The key transitions made possible by DXP:
 - Provides lean models, based on light weight portals
 - Provides modular and flexible platform with ready to use capabilities
 - Combines customer data, used experience and business data
 - Provides end to end touchpoint optimization and personalized experience
- By deployment type, the DXP Market has been segmented into cloud and on-premises
 - The cloud segment is expected to grow during 2019-2024, due to its cost-efficiency and hassle-free integration
- The market in North America is expected to grow at a high rate during 2019-2024, due to the rapid adoption of advanced technologies by industries

○--> Shift from Jan 2018 to Feb 2019 Magic Quadrant

Case study: Bloomreach, a leader in digital experience

BloomReach

Business overview

- Founded:** 2009
- Website:** www.bloomreach.com
- HQ:** Mountain View, CA
- Employees:** 420+
- Funds raised:** \$97.3m
- Last Financing Type:** Series D
- Bloomreach provides software products that enables personalized digital experiences for retailers, brands, distributors, and manufacturers worldwide
- In 2019, it partnered with EPAM Systems to deliver modern, connected commerce experiences for their joint customers, built on Bloomreach's AI-driven digital experience platform BRX
- In 2016, it acquired web content management company Hippo

Core offerings

brX

Bloomreach Experience Cloud

- A digital experience platform that combines AI search, merchandising, and personalization with CMS
- It accelerates conversions, increases revenue, and provides real-time insights

brXM

Bloomreach Experience Manager

- A CMS solution for marketers and developers
- Provides personalization and channel management capabilities to drive results

Select trends in digital experiences

AI to develop within customer service space and predictive analytics to make an impact

- According to Conversational, ~66% of customers switch brands because they have experienced poor customer service
- Predictive analytics optimize marketing campaigns, help brands determine consumer responses, and improve operations by forecasting inventory and managing resources
- Bloomreach leverages headless CMS, uses sets of algorithms and advanced merchandising tools to help improve customer experience, shorten the customer journey, and increase conversion

Customers will expect hyper-personalized experiences

- Based on Internet Retailing report, 69%* of consumers expect a personalized experience, yet less than 50% of brands are delivering
- Hyper-personalization can only be achieved with access to in-depth data about consumers
- Bloomreach solutions collect data, set logic, test content performance, and identify trends makes it easy to orchestrate omnichannel personalization from one central place
- It creates targeted customer experiences across mobile, social and web channels to deliver the right content and products to the right audiences at the right time

4

Strong marketing analytics tools are fueling the success of personalization

Personalization services are undergoing a digital transformation powered by analytics

- **Personalization capabilities are now viewed as critical in achieving a unified customer experience**
 - B2C, and increasingly, B2B sellers are investing in customer individualization and intimacy
- Historically a poorly defined category, Personalization Services is now entering its “**Version 2.0**”
 - **First generation solutions** were characterized as being **complex** and difficult to implement resulting in delays as marketers had to rely solely on IT
 - Next generation SaaS providers are now **leveraging big data**, AI and machine learning to create meaningful **one-to-one** consumer and buyer connections
 - This new generation of providers puts the marketer in charge, through **personalized pages** and **personalized product recommendations**
- **Consolidation** occurs as larger platforms strive to meet retailers’ agendas
- **Strategic acquisitions** lead to early interest from venture capitalists/private equity

“77% of consumers have chosen, recommended, or paid more for a brand that provides a personalized experience.”

- Forrester Research

“59% of shoppers who have experienced personalization believe it has a noticeable influence on purchasing.”

-Rethinking Retail, Infosys

“Personalization is helping us build relationships with our customers that translate into increased engagement, loyalty and revenue.”

- Simon Pritchard, Group Digital Director, Arcadia

“70% of retailers cited personalization of the customer experience as a leading customer engagement priority for 2017.”

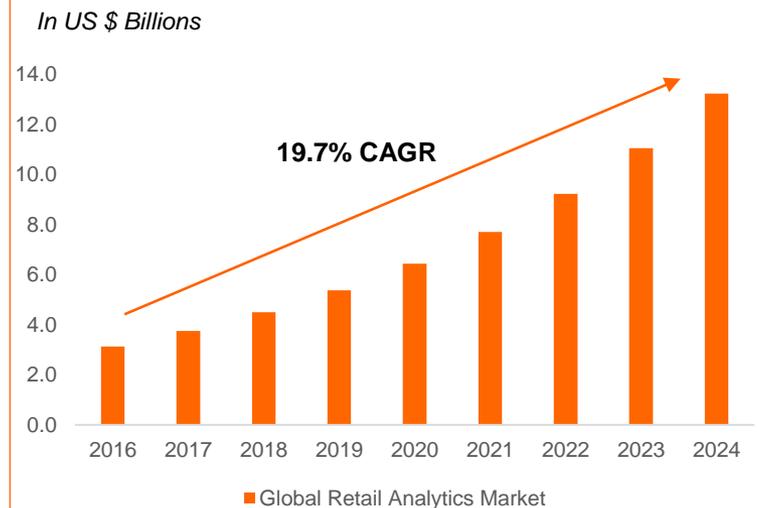

- Boston Retail Partners 2017 Customer Engagement Survey

Retail Analytics will experience a rapid boom over the next few years

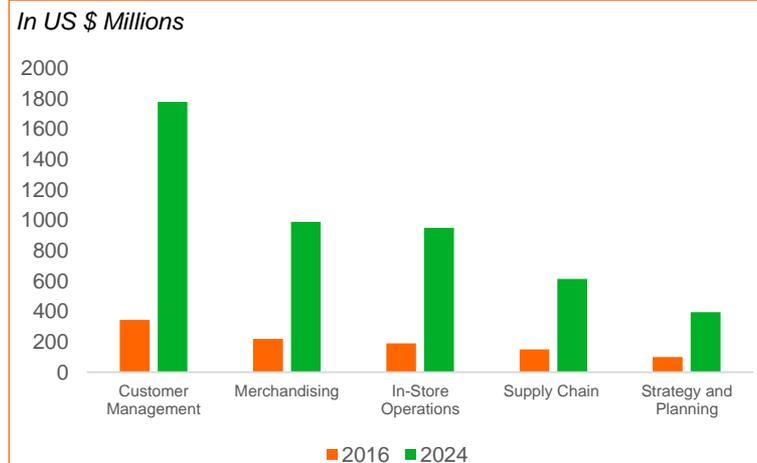

At-a-Glance: Retail analytics market breakdown

- Expected to exceed **\$13B by 2024** from \$3.1B in 2016, growing at a CAGR 19.7%
- Many major business leaders recognize the value of analytics
 - 49% of high-performance companies have CEOs who believe strategic, actionable insight based on customer analytics are vital to an organization's success
 - Furthermore, 62% of retailers report that the use of analytics creates a competitive advantage for companies
- Despite this, most retailers struggle to make the most of their data
 - 74% of firms say they want to be data-driven, but only 29% are successful at connecting analytics to action (Forrester)
 - Furthermore, of the 700 million websites that exists, 72% fail to consistently engage users or drive conversions (Penn)
- Companies that are successful in implementing analytics experience a myriad of benefits:
 - Highly data-driven organizations are 3 times more likely to report significant improvement in decision-making
 - Companies championing the use of retail analytics are 6.5 times more likely to retain customers, 7.4 times more likely to outperform their competitors on making sales to existing customers and nearly 19 times more likely to achieve above-average profitability
 - 50% of companies who master the art of analytics are likely to have sales significantly above their competitors

Global retail analytics market size

US Retail analytics by application

Location intelligence gives B2B marketers a competitive edge in building customer relationships and accelerating innovation

Location aware mobile messaging

- *Hyperlocal-targeted mobile messages using location as a context*

- *Enables consumers to take advantage of an offer, the moment it is delivered*
- *Payment processors, ad-tech platforms, retailers have already started collaborating.....*

Enhancing customer experiences

- *Enhance guest experiences in large venues like stadiums, resorts*

- *Way-finding, ordering and queue management for in-demand services like restrooms or drinks can be enhanced with location data and analysis*

Zeroing on high value customers in retail

- *In store location technologies like beacons, RFID are being increasingly used to identify high value customers (loyalty app on phones) and notify sales staff*

Trend is towards leveraging Location-sophisticated programs to effectively build customer relationships

THE "WHERE" FACTOR EQUATION

What if?
Customer's Location

What if?
Location Data Sets

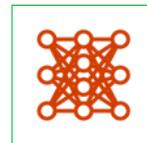

What if?
The "Where" Factor

By layering the customer's latitude and longitude with "what he or she is doing" data, marketers can generate insights and ideas about the customer that creates a value exchange with a brand

Build **location-specific value** into apps, thereby giving an incentive to customers in sharing their location if value is added

Create an **intelligence hub** by converting customer names, addresses into geocodes, thereby enabling better customer profiling

Seeking **technology partnerships**, thereby gaining access to more location data sets, effectively giving "location fuel injection" to the app

ComCap helps drive global ecommerce outsourcing expansion through \$15mm equity investment

Global outsourcing leader with premier client base, seeks expansion via digital services & new geographies

- Based in Tokyo, founded in 1985, (TSE: 09715) since 1997
- \$1.5B in sales, ~16,000 employees, ~ 800 clients
- Leading BPO, contact center, digital marketer w. Asia expertise
- Proactively sought to meet clients' Int'l. expansion needs
- Identified ecommerce as next evolution in outsourced services

Clients

Capabilities

International outsourced ecommerce with robust capabilities and iconic global brands

- Based in Texas, founded in 1994, IPO 1999 on NASDAQ: PFSW
- \$250M in sales, 1,400 employees, >60 brand name clients
- Best in class provider of end-to-end ecommerce outsourcing
- Established operations in N. America and Europe
- Seeking strategic partners to achieve a global solution

Clients

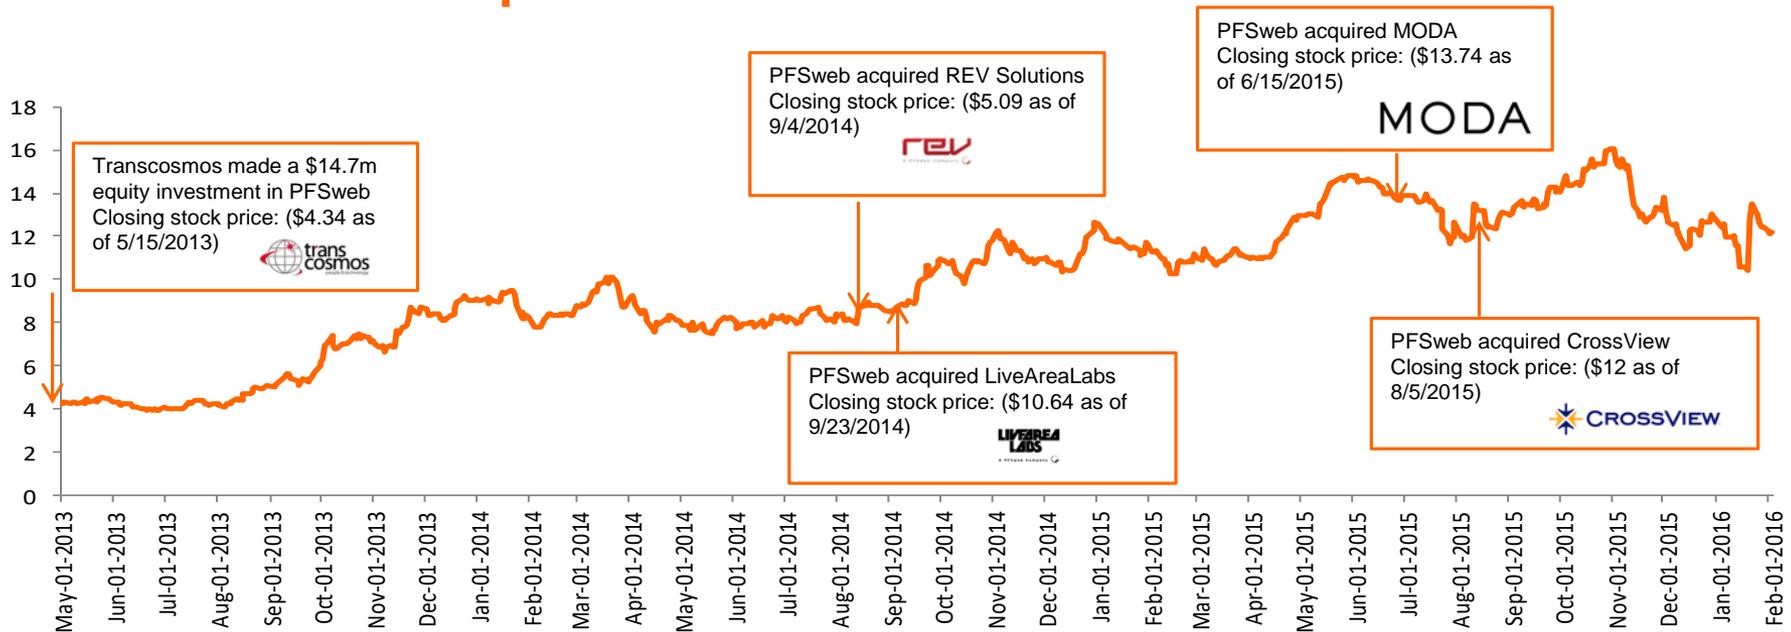

Capabilities

Working with fifteen different strategic partners over four months, ComCap brought together a large strategic and a best-of-breed point provider to create a best-in-class, end-to-end, global solution

PFSW Case Study – Stock price increase following 1 equity investment & 4 acquisitions

ComCap's role

- Developed acquisition strategy in terms of services offered (system integrators, creative agencies, marketing agency, technical agencies, etc.), geographical reach (Europe, Asia, North America) and technology platform partnership (Demandware, Magento, and Hybris)
- Reached out to a variety of lenders including asset management firms, hedge funds, and strategic investors, resulting in a \$14.7m investment from Japanese ecommerce solutions provider Transcosmos
- Managed and executed deal from submitting an LOI package to negotiating deal structure and terms to conducting due diligence calls on the acquisition target's top clients
- Improved PFSweb's geographical presence and service offering in Europe, resulting in cross-selling opportunities with its newly acquired subsidiaries and access to marquee European clients in retail and luxury
